Summary

Full Stack Developer with hands-on experience architecting scalable web applications, RESTful APIs, and secure authentication systems. Proficient in modern frameworks (React, Next.js, Node.js) and integrating AI/ML models (CrewAI, PyTorch) to engineer intelligent, production-ready solutions. Strong focus on clean code, performance optimization, and end-to-end robust development.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, SQL

Frontend: Next.js 16, React.js 19, Tailwind CSS, HTML5, CSS3, Playwright

Backend & Cloud: Node.js, Express.js, FastAPI, RESTful APIs, AWS, Render, Vercel

ML & AI: CrewAI, PyTorch, TensorFlow, Google Gemini, Feature Extraction

Databases & Tools: PostgreSQL, MongoDB, MySQL, Git, GitHub, Postman, Docker

Experience

Full Stack Developer Intern, DekNek3D

Jan 2026 – Feb 2026

- Developed and optimized highly scalable web applications utilizing React, Node.js, and Express.
- Designed robust RESTful APIs and efficient database schemas, resulting in significantly improved application response times and data handling.

Technical Trainer Intern, CertifyO

May 2025 – Jun 2025

- Delivered comprehensive JavaScript and web development training to 50+ students, focusing on ES6+ and modern web APIs.
- Mentored students through hands-on curriculum, including interactive frontend interfaces and full-stack API integrations.

Projects

Draftly — Enterprise Content AI

Deployed Link

- Architected a multi-agent full-stack platform using Next.js 16, FastAPI, and PostgreSQL to automate policy-aware marketing content generation via CrewAI and Google Gemini.
- Engineered real-time generation streaming with Server-Sent Events (SSE) and implemented robust AES-based Fernet encryption for secure API key storage.

VoxGuard AI — Multilingual Deepfake Speech Detector

GitHub Link

- Designed an SE-ResNet PyTorch model to detect synthetic speech anomalies across 5 languages.
- Applied sliding-window inference and temperature scaling over overlapping audio chunks to ensure reliable, high-confidence scoring.

DataGuardian — Privacy & Security Extension

GitHub Link

- Built a Chromium extension featuring a real-time dashboard to autonomously detect and block third-party trackers.
- Integrated strict Content Security Policy analysis and SSL validation utilizing Chrome Extension APIs.

Extracurricular Activities

Software Development Core Member, Data Science Club, VIT Bhopal

Jan 2025 – Present

- Spearheaded the development of the official club platform serving 500+ active users using React and Node.js.
- Implemented advanced code splitting and lazy loading architectures, achieving 40% faster page load times.

Open Source Contributor, GSSoC (GirlScript Summer of Code)

- Contributed effectively to 10+ open-source projects by resolving bugs, engineering feature enhancements, and optimizing legacy code.

Education

Vellore Institute of Technology, B.Tech in Computer Science and Engineering

2023 – 2027

- CGPA: 8.91 / 10.00

Certifications

- NPTEL Online Certification: *Introduction to Machine Learning* (Elite Badge — 85%)
- Udemy: *The Complete Full Stack Web Development Bootcamp*
- Coursera: *The Bits and Bytes of Computer Networking* by Google
